

ENCLOSURES

Our enclosures were originally designed to house Alpha's power supplies. We are not limited to standard cross sections or pre-formed parts. We can, therefore, build cabinets in virtually all sizes and form-factors, from 19 inch chassis to walk-in, multi-megawatt enclosures.

Our fabrication shop has the necessary equipment to produce enclosures with up to 20-foot dimensions.

We can build an enclosure for your application!

Features

- Fully Enclosed
- Steel, Aluminum, or Stainless construction
- All welded structural members
- NEMA 1 through NEMA 12
- Custom sizes
- Custom paint colors

Applications

- Electronics Enclosures
- Storage
- Switchgear
